1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/18/2003 has been entered.

2. Claim 47 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 47 is dependent from cancelled claim 35 (amendment of 1/8/2003) and as such is incomplete.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 2876

5. Claims s 1-17,43-46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sato et al 5,742,039 in view of Johnson et al 5,991,876. Sato and Johnson disclose the elements as seen in the previous office action and remain combinable for the same reasons as previously set forth. Sato and Johnson fail to teach or disclose affixing a semiconductor device to a book as now claimed. Garber et al 6,486,780 teaches throughout a RF tag insertable (affixable) to a book. There is disclosed a memory device (semiconductor device) for maintaining records regarding the book. It would have been obvious to a person of ordinary skill in the art at the time of the invention to use the system of Garber and replace the label of Sato/Johnson with the RF tag of Garber. This would allow for constant tracking of the location of a book within a facility and for automatic updating of the records regarding the book.

6. Applicant's arguments with respect to claims 1-17,43-46 (and related elements of new claim 47) have been considered but are moot in view of the new ground(s) of rejection.

7. Please note that the examiner and TC Art Unit in which this application is being examined have changed.
